## What is Find Safe?

Find Safe is a program funded by a grant from the U.S. Department of Justice (DOJ), Office of Justice Programs (OJP), Bureau of Justice Assistance (BJA), to assist in the Reducing Injury and Death of Missing Individuals with Dementia and Developmental Disabilities Program. The Find Safe program works in conjunction with Project Lifesaver®, North Dakota law enforcement, and first responders.

The Find Safe goal is to collaborate with and support law enforcement and public safety agencies in their efforts to reduce and prevent injuries and deaths of missing individuals with dementia or developmental disabilities in the state of North Dakota.

## How does Find Safe work?

Individuals enrolled in Project Lifesaver® wear a small transmitter on the wrist or ankle that emits an individualized frequency signal. If the individual goes missing, the caregiver notifies their local emergency responder. Trained emergency responders and law enforcement will then use the client's individualized frequency to locate their position. Knowledge given by the family is provided to the first responders so they will know how to best approach the individual once found and allow them to be brought back safely.

## How do I enroll a loved one in Find Safe?

To enroll in the Find Safe program or for questions, please contact:  
**Vanessa Rovig, Find Safe Program Director**  
North Dakota Center for Persons with Disabilities  
Minot State University  
500 University Avenue W., Minot, ND 58707
